

All-Steel Precision Paper Trimmers

A necessary adjunct to the well-equipped darkroom, Kindermann all-steel paper trimmers are specially designed for easy, accurate use even under safelight illumination. No slipping . . . no sliding . . . no accidental dropping of the blade! Scale measurements are easy to read. Models with smaller baseboards are wider at the operator's end to allow generous hand room for holding paper firmly. Specially ground nickel-plate steel blade will hold its edge over amazingly long periods of constant use. Equipped with a safety spring to hold the blade when not in use. Transparent plastic pressure strip at cutting edge locks paper into a straight cut position.

Sturdy fulcrum arrangement permits cutting of all photographic materials from thinnest tissue to heavy mounting board with ease, and with no danger of forcing the blade out of alignment. Available in straight-edge or decorative deckle-edge models. Handsome crackle finish with skidproof rubber feet.
